# Security. Made Simple.

Secure storage, always

Sign in with a single click

Easy sharing, when you need to

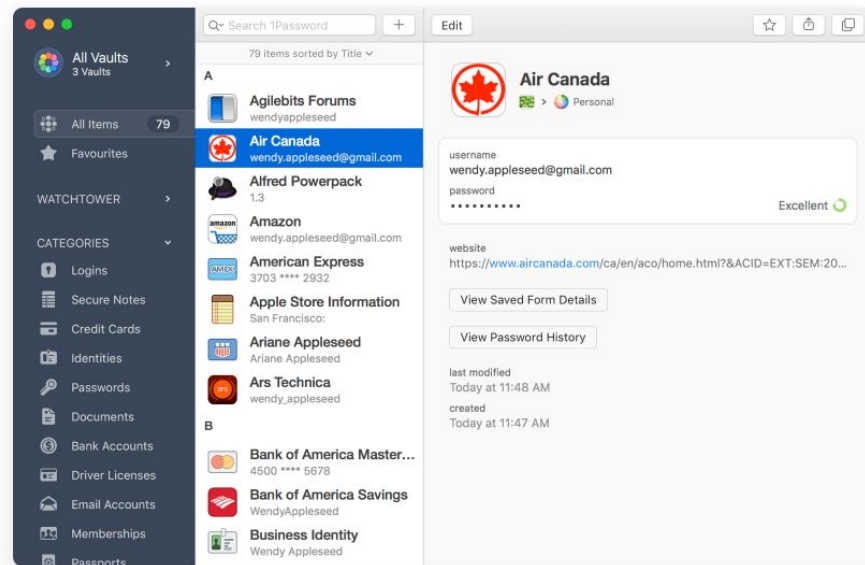

Better password hygiene

Award winning support

Security for everyone, on every device

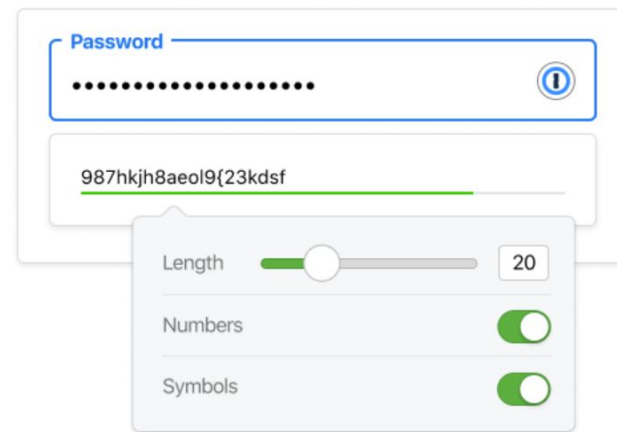

## Security and compliance built-in

- ✓ Data encrypted at rest and in transit
- ✓ Tamper-proof, authenticated encryption
- ✓ Brute-force protection with PBKDF2
- ✓ Data residency options
- ✓ Audit logs
- ✓ SOC2 compliant
- ✓ Customisable access policies
- ✓ Secure vault sharing
- ✓ Custom groups and roles
- ✓ Account recovery

## Sign-ins made simple

Log into any app or service with a single click, 1Password is the simplest way to create, share, and use strong passwords

## Easy deployment and SCIM provisioning

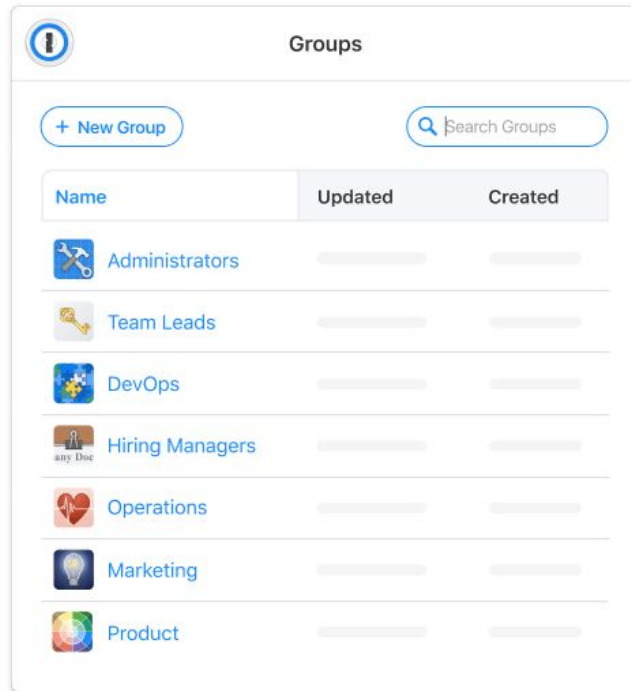

1Password integrates with Azure AD, Okta, OneLogin, and Slack so you can provision employees using the systems you already trust

## Simple and powerful administration

Set permissions at scale, or customise access by user, group, or vault. Delegate admin responsibilities to trusted members to help you manage your account.

- ✓ Shared vaults
- ✓ Custom groups
- ✓ Custom roles
- ✓ Account recovery
- ✓ Guest accounts

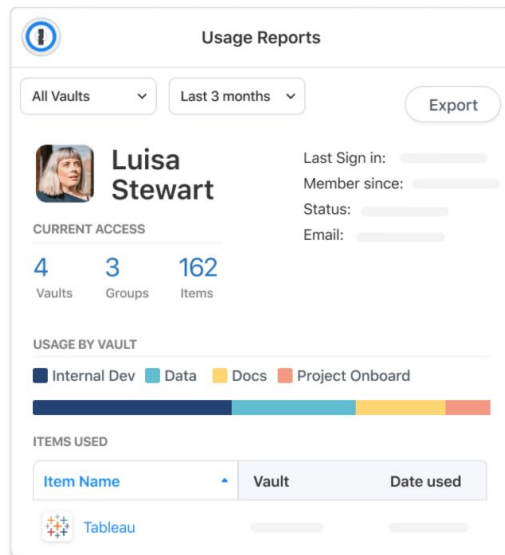

## Custom reporting

Identify potential threats before they happen with advanced reporting. See if company email addresses or credentials have been exposed in a data breach, and invite employees to 1Password to secure exposed entry points.

Get an insight into how your business is using 1Password with tailored analytics.

Integrate with tools like Splunk to create custom alerts and detailed logs.
